

Haadibadi Community Library

February was a busy month at the Haadibadi Community Library. Several events such as the Annual Day program, dance performances, topography session, science exhibition, etc. were conducted, where the young members participated actively. In spite of the reopening of the schools, young enthusiasts managed to make time to come to the library.

What's New ?

On 21st February, a **Clay Storming session** was conducted by Tejaswini Krishna, wherein she honed the creative skills of the young artists.

Annual Day Program

Haadibadi organized an Annual Day Celebration on 7th of the month in the library. The event included a Bharatanatyam dance performance followed by a Folk dance performance and a puppet show. This was followed by the release of the first edition of **Vachana- Haadibadi's newsletter**. Young members and their parents, who attended the program, were keen to know what their little ones were up to in the Community Library.

The highlight of the evening was the prize distribution ceremony, with exciting categories such as Honeybee (for the most consistent visitor), Hummingbird (for the voracious reader), Owl (for the most committed member of the library), Dove (for the best guide to other members), Grasshopper (for the avid reader), Butterfly (for the book explorer) and Eagle (the most inspirational book keeper). Parents awarded medals to the dedicated young minds recognizing their contribution to the library. The results of the Sports Day were also announced and sports achievers were honoured with medals and certificates.

Session on Maps

In order to draw our learners' interest towards maps and their utility, a fun little activity was organized, wherein they were asked to draw a map of their neighbourhood locating their house, the streets and the nearby houses and shops. This was followed by a discussion on the maps of the city, state and country.

- Library Sessions
- Reading Practice
- Storytelling Sessions
- Bharatanatyam Classes
- Park Visits
- Spoken English Course

National Science Day

On account of National Science Day, ie. 28th February, we at Haadibadi, organised a **Science Exhibition** for the budding scientists, who demonstrated experiments on air pressure, static energy, acid-base, etc.

Prior to the exhibition, sessions were conducted on Saturdays by Divya Hari Rao to train learners in the wondrous ways of science and help them understand the concepts in depth.

She said, "When young learners performed the experiments for the first time, the sparks of joy in their eyes was the most priceless thing to witness. Those theories that they had learnt in classroom were practically working which managed to trigger their interest towards science."

The experimenters and their parents displayed great interest towards the exhibition and even the parents were curious to know and learn the concepts for the respective experiments.
